

Are you looking to kick start your career with an electrician apprenticeship?

Engenda Group is currently hiring apprentices in North East Lincolnshire for September college intake, and we want to speak to you!

Electrician Apprenticeships are a great way to gain the knowledge and experience required to become an electrician through on the job training with an apprentice employer or apprenticeship training provider.

By starting an apprentice electrician career, you will gain valuable experience whilst learning on the job from seasoned professionals looking to transfer their valuable knowledge and skills to the next generation of electricians. You will also attain the qualifications needed to become a fully qualified electrician, with Engenda Group and a local college.

Becoming an electrician apprentice offers many benefits, including:

- Exciting and Challenging Field

As an electrician apprentice, you will have the opportunity to work in an exciting and challenging field. You will be solving electrical puzzles and gaining valuable skills and experience.

- Earn-While-You-Learn

One of the great advantages of being an electrician apprentice is that it's an earn-while-you-learn program. As you gain more skills and experience, you can increase your earnings.

- Career Growth

The field of electrical work offers excellent career growth opportunities. With the right training and experience, you can advance to become an approved electrician or a future project supervisor.

- Competitive Pay

Electricians are in high demand across the UK, and they are well-compensated for their skills. According to Glassdoor.co.uk, the average basic pay for an Electrician in the UK is nearly £38,000 a year, but this does not include enhanced employment benefits, overtime or bonuses available.

- Hands-On Experience

As an apprentice, you will receive hands-on training and experience. You will have the opportunity to work alongside experienced professionals and learn from their expertise.

When you become an electrician there are many options open to you to be able to kickstart a career with an employer. You would need to decide early on in what area you want to become an electrician from installing power and lighting systems to fire security or whether you want to maintain the building control systems. Other electrician jobs would require you to also go through further training on specific machinery with transformers, compressors, pumps or HV systems. Our apprenticeships will cover the required skills and knowledge to be able to carry out your duties correctly when qualified.

Electrician jobs can include:

- Maintenance Electricians
- Installation Electricians
- Electrical Systems
- Machine Repair and Maintain Electricians
- Building Services Electricians

## **But with the amount of apprenticeship opportunities out there, why should you choose Engenda Group?**
